The mobile telephone has dial-, function- and soft-keys, a display and an integrated hand-held transmitter/receiver. Received text messages are acknowledged by pressing a soft key, a yes key and a transmit key, and a yes response signal is sent to the sender of the message, along with the message and the number of the responder. The mobile telephone includes an intelligent learning system and a phone book. Entries in the book can be marked to form a group and a message can be send to every receiver in the group.
